

STARTUP NATION

OBJECTIVES

- Provide a platform for entrepreneurs and young professionals to share their struggles, successes, and ideas with one another in a judgement-free zone via the startup forum.
- Connect users to opportunities (such as local internships, employment, or a product market) through online networking.
- Empower users to create their own professional profile and/or business profile with an online store.

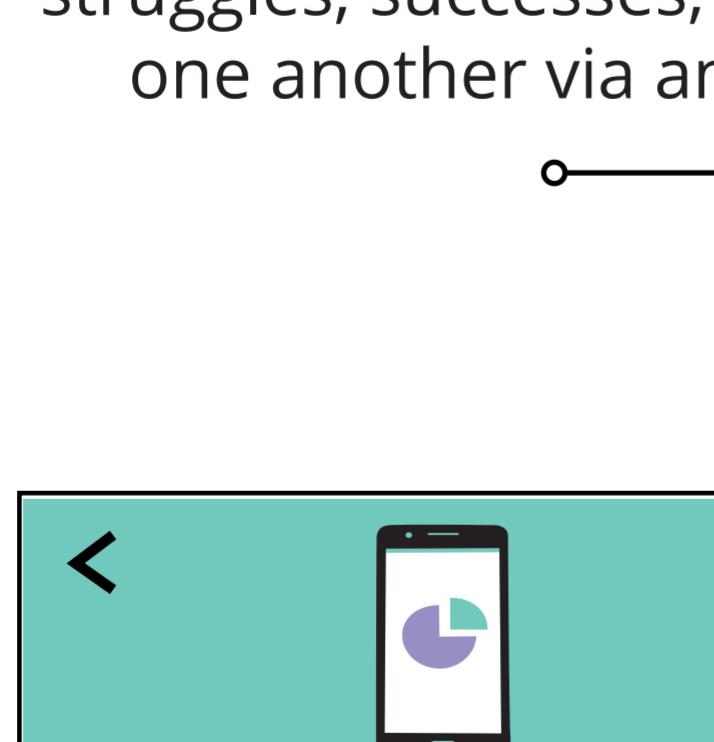

VISION

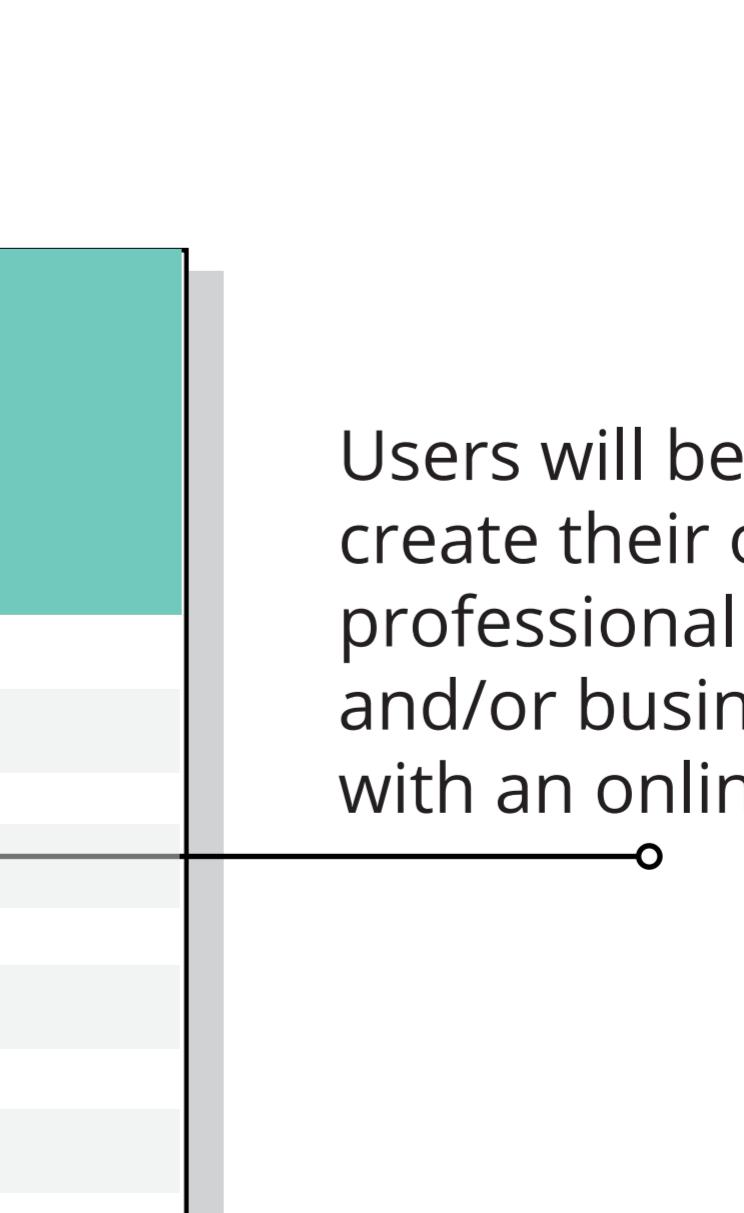

To promote the development of youth by providing them with the tools to improve their socioeconomic conditions, and increase their self-esteem, leadership skills, and the full exercise of their rights.

MISSION

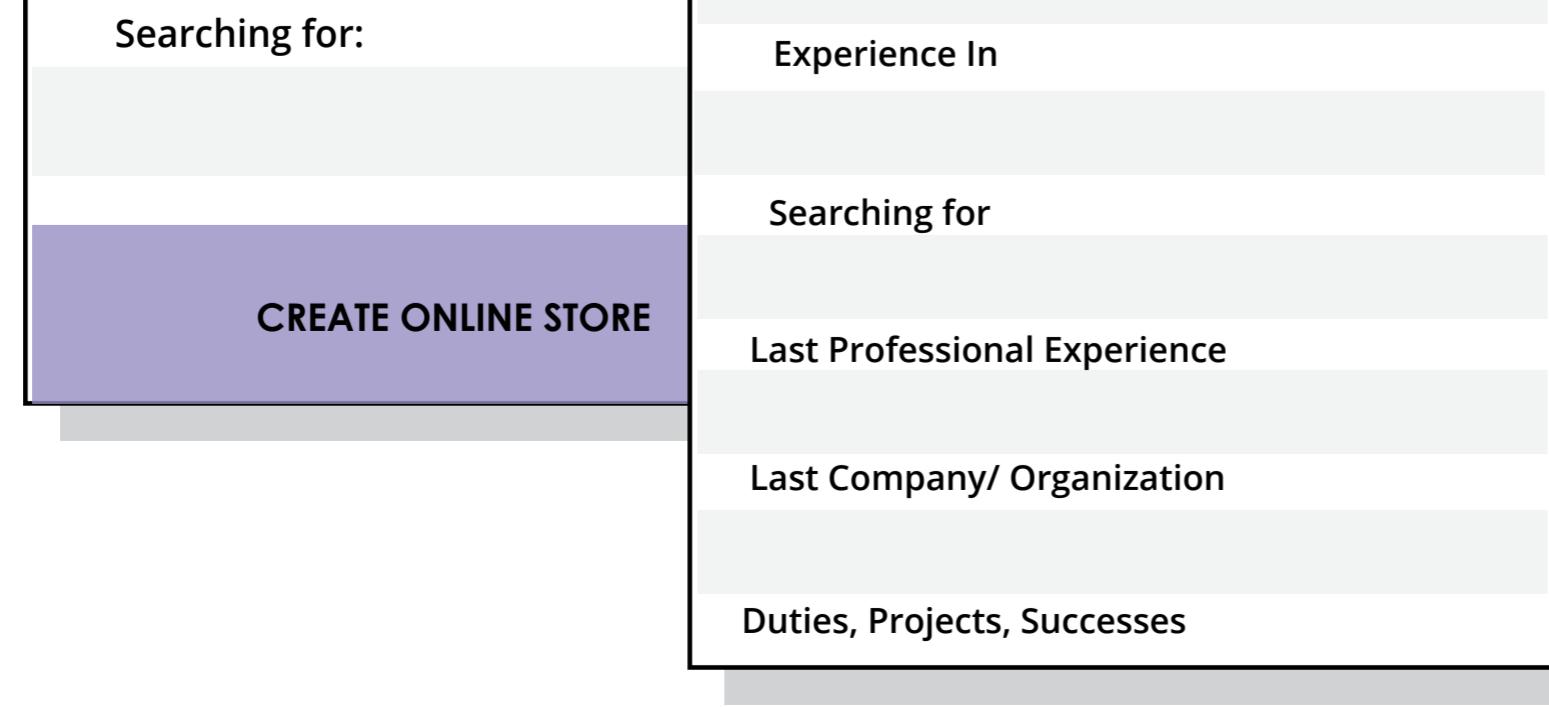

That young women and men have opportunities for development both personally and as a community, through innovative and sustainable entrepreneurship.

This function, called 'The Network', will serve to connect users to opportunities (such as local internships, employment, or a product market) through online networking.

The mobile app will let users access professional development, life-coaching, and entrepreneurship materials and resources as well as the opportunity to share their struggles, successes, and ideas with one another via an online forum.

Users will be able to create their own professional profile and/or business profile with an online store.
